**ROAD TRAFFIC ACCIDENT DATA AND  
RATES: Australia, States and Territories  
1925 to 1981**

Australian Government Publishing Service  
Canberra 1984

## Document retrieval information

Report No. OR 7    Date February 1984    ISBN 0 644 03025 9    Pages i-vi, 1-35

### Title and subtitle

Road traffic accident data and rates: Australia, States and Territories 1925 to 1981

### Author(s)

### Performing organisation (name and address)

Road Safety Information Service  
Office of Road Safety  
Department of Transport  
PO Box 594  
Civic Square, A.C.T. 2608

### Keywords

Accident statistics  
Accident rates

### Abstract

Frequently used road traffic accident data and rates have been collated for Australia for the years 1925 through 1981.

More detailed data for States and Territories and by type of road user are presented for the years 1950 through 1981.

### Note:

This report is disseminated in the interest of information exchange. The views expressed are those of the author(s) and do not necessarily represent those of the Commonwealth Government.

The Office of Road Safety publishes two series of reports resulting from internal research and external research, that is, research conducted on behalf of the Office. Internal research reports are identified by OR while external reports are identified by CR.

## Definitions and abbreviations

The following definitions are derived from current practice and their interpretation may vary across States and/or time.

### *Casualty accident*

1925-77

Any road traffic accident which results in death of a road user within 30 days or need for medical or surgical attention.

From January 1980

Any road traffic accident which results in death of a road user within 30 days or where at least one person was admitted to hospital.

### *Casualty*

1925-77

Any person who, as a result of a road traffic accident, dies within 30 days of the accident or requires medical or surgical attention.

From January 1980

Any person who, as a result of a road traffic accident, dies within 30 days of the accident or who requires admission to hospital.

### *Fatal accident*

Any road traffic accident which results in death of a road user within 30 days.

### *Fatality*

Any person who, as a result of a road traffic accident, dies within 30 days of the accident.

### *Injury accident*

1925-77

Any road traffic accident which results in need by a road user for medical or surgical attention. Excludes fatal accidents.

From January 1980

Any road traffic accident in which at least one injured person was admitted to hospital.

### *Injury*

1925-77

Any person who as a result of a road traffic accident, requires medical or surgical attention. Excludes fatalities.

From January 1980

Any person who as a result of a road traffic accident requires admission to hospital.

### *Driver*

Person in control of vehicle other than pedal cycle or motor cycle.

### *Motor cyclist*

Motor cycle rider.

*Passenger*

Occupants, other than drivers, of motor vehicles. Includes pillion riders of motor cycles and bicycles.

*Pedal cyclist*

Bicycle rider.

*Pedestrian*

Persons not identified as being a driver/rider or passenger in a vehicle. May include persons boarding or alighting from vehicles.

*Other (road user)*

Includes occupants of non-motor vehicles (horse drawn vehicles, trams and road plant equipment).

*Road traffic accident*

Any apparently unpremeditated event reported to the police or other relevant authority and resulting in injury (including death) or property damage attributable directly or indirectly to the movement of a vehicle on a road.

kL	Kilolitre
N.S.W.	New South Wales
Vic.	Victoria
Qld	Queensland
S.A.	South Australia
W.A.	Western Australia
Tas.	Tasmania
N.T.	Northern Territory
A.C.T.	Australian Capital Territory
-	Means data not available
0	Means zero persons killed

**Explanation for inclusion of 'A' tables**

During the years 1978-81 the data sources for several of the tables in this report changed either the criteria used for definition or the basis on which the information was calculated. For this reason and to keep tables uniform, separate additional tables have been used for these years in all categories.

# **Introduction**

## **Need for mass data**

Data on road traffic accidents comprise information on system behaviour required by those responsible for making decisions about the safety of the road transport system. Comparative information on characteristics of vehicles, roads and road users is also required so that meaningful rates of occurrence are developed (Lane 1974).

In Australia, the Australian Bureau of Statistics (ABS) provides national data (Bagley 1974) for use by a wide range of individuals and authorities both in private enterprise and government (Lane 1972). Examples of use of mass data are in monitoring the effectiveness of Australian seat belt fitting and wearing legislation (Milne 1979) and motor cyclist helmet wearing legislation (Foldvary and Lane 1964).

## **Uniformity**

The value of mass data is enhanced when uniform reporting and recording criteria are employed to permit collection of a reliable set of data at the national level. In Australia attempts to attain uniformity have been in progress for many years (Johinke 1974). Uniform definitions of items to be recorded such as vehicle type and road situation were developed (Commonwealth Bureau of Census and Statistics 1973, Advisory Committee on Road User Performance and Traffic Codes 1978) and have gradually been adopted by the States and Territories.

## **History in Australia**

Road traffic accident data were first collected in some Australian States in 1911 and national tabulations were first produced in 1925. National figures of casualties by type of road user are available for the years 1950 through 1977.

In July 1978, the ABS ceased publishing detailed traffic accident statistics at the national level. This was due to a lack of uniformity among States in the definition of data items and in reporting and recording procedures.

From March 1980, a new publication entitled 'Road traffic accidents involving casualties (admissions to hospitals) Australia' was released following the adoption by all States and Territories of the injury classification injured, admitted to hospital.

To cover the interim period, the Office of Road Safety collected statistics on fatalities in all States and Territories for the years 1978 and 1979. Data relating to injured persons was not collected due to the above-mentioned problem of inconsistent reporting and recording procedures.

The information for Queensland, Victoria, Western Australia and Tasmania was obtained from State ABS publications whilst information relating to Northern Territory, South Australia, New South Wales and the Australian Capital Territory was obtained from the Road Safety Council, Road Traffic Authority, Traffic Accident Research Unit and Department of the Capital Territory respectively.

Limited information on casualty accidents was also published by ABS for 1978 and 1979 in their Year Books.

The tables which follow represent the most reliable and comprehensive information which could be collated for the period 1925 to 1981.

Specific data gaps identified were:

1. Queensland 1954 to 1977—no licence data
2. Northern Territory 1925 to 1961—no accident data
3. Northern Territory 1963 to 1967—no licence data

To accommodate these gaps, Australian rates have been calculated which:

1. exclude Queensland accidents for 1954 to 1981 for rates per 10 000 licences
2. exclude Northern Territory population, registration and licence data for 1925 to 1961 for rates per 100 000 population, 10 000 vehicles and 10 000 licences. Similar exclusion for rates by fuel consumed could not be done due to lack of fuel consumption data by State/Territory
3. exclude Northern Territory accident data for 1963 to 1967 for rates per 10 000 licences

### Major legislative influences

A number of changes in both accident reporting and recording criteria were introduced during the period covered by the following statistics and these are detailed in the Notes to tables. Effects of these changes are basically unquantifiable.

The introduction of compulsory fitting and wearing of seat belts, protective helmets and random breath testing are probably the most important changes implemented.

Through the endorsement of the Australian Transport Advisory Council of Australian Design Rules for Motor Vehicle Safety, the fitting of belts in passenger cars and derivatives in each State was made mandatory for new motor vehicles from 1 January 1970 for front seats and from 1 January 1971 for all positions.

The year 1973 saw the completion of laws requiring the compulsory wearing of seat belts, where fitted, in all motor vehicles, and the mandatory use of protective helmets by motor cycle riders and pillion passengers. The dates on which the laws came into effect were as follows:

<i>State or Territory</i>	<i>Seat belts</i>	<i>Protective helmets</i>
New South Wales . . . . .	1 October 1971	1 August 1971
Victoria . . . . .	22 December 1970	1 January 1961
Queensland . . . . .	1 January 1972	24 October 1970
South Australia . . . . .	29 November 1971	31 December 1967
Western Australia . . . . .	24 December 1971	1 May 1971
Tasmania . . . . .	13 October 1971	19 December 1966
Northern Territory . . . . .	1 January 1972	8 November 1972
Australian Capital Territory . . . . .	1 January 1972	18 March 1973

The laws in force differ between States and Territories on matters such as exemptions and penalties. The exemptions for seat belts relate primarily to delivery men, persons reversing motor vehicles, the elderly, and persons exempted by a doctor's certificate. The vast majority of belts fitted to vehicles are of the lap-sash type. Recent developments in seat belt design are aimed to improve their comfort to the wearer, their ease of adjustment and their effectiveness.

There are minor exemptions for helmet wearing by motor cyclists in some States.

Victoria was the first State to introduce random breath testing in July 1976, followed by the Northern Territory in 1980 and South Australia in 1981, with New South Wales and Australian Capital Territory in December 1982 and Tasmania in January 1983.

## Sources of data and notes to tables

### Australian Bureau of Statistics

Most of the figures contained in this Bulletin have been extracted from Australian Bureau of Statistics (ABS) publications. Previously, the ABS was known as the Commonwealth Bureau of Census and Statistics, the change being officially made on 15 March 1974.

Many of the ABS publications have been revised, deleted or re-designated, both before and after the organisational name change. Recently, publications have been allocated unique catalogue numbers, replacing the reference numbers.

The source information provided indicates those publications from which the series of data have been obtained. Further detail is usually available in these publications or corresponding publications from the State offices of the ABS, the Department of Motor Transport in New South Wales and the Department of Territories and Local Government in Canberra.

## Sources of data

<i>Data</i>	<i>Year</i>	<i>Source</i>
Accidents, Casualties	1925 to 1971	Commonwealth Bureau of Census and Statistics. Transport and communication bulletins. Ref. No. 14.11.
	1972, 1973	Commonwealth Bureau of Census and Statistics. Road traffic accidents involving casualties. Quarterly. Ref. No. 14.9.
	1974 to 1977	Australian Bureau of Statistics. Road traffic accidents involving casualties, Australia. Quarterly. Cat. No. 9403.0.
	1978, 1979	Year Book, Australia. Cat. No. 1301.0.
	1980, 1981	Australian Bureau of Statistics. Road traffic accidents involving casualties (admission to hospital) Australia. Quarterly. Cat. No. 9405.0.
Population	1925 to 1970	Australian Bureau of Statistics. Demography 1971. Bulletin No. 87. Canberra, 1974. Ref. No. 4.9.
	1971 to 1977	Australian Bureau of Statistics. Population and vital statistics. Quarterly. Cat. No. 3212.0.
	1978 to 1981	Australian Bureau of Statistics. Australian demographic statistics. Quarterly. Cat. No. 3101.0.
Vehicles	1925 to 1967	Commonwealth Bureau of Census and Statistics. Transport and communication bulletins. Ref. No. 14.11.
	1968 to 1972	Commonwealth Bureau of Census and Statistics. Motor vehicle registrations. Quarterly. Ref. No. 14.2.
	1973 to 1981	Australian Bureau of Statistics. Motor vehicle registrations, Australia. Quarterly. Cat. No. 9303.0. Revised intercensal estimates may be made on basis of vehicle censuses undertaken in 1955, 1963, 1971, 1976.
Licences	1925 to 1971	Commonwealth Bureau of Census and Statistics. Transport and communication bulletins. Ref. No. 14.11.
	1972 to 1977	Australian Bureau of Statistics. Rail, bus and air transport, Australia. Cat. No. 9201.0.
	1978 to 1981	Year Book, Australia. Cat. No. 1301.0.
Fuel	1946 to 1981	Department of National Development. Consumption of petroleum products based on oil industry sales by state marketing areas.  Australian Institute of Petroleum. Oil and Australia: the figures behind the facts, plus information provided direct to Office of Road Safety, Department of Transport.

## Notes to tables

The following information should be referred to when reviewing the data available in the tables. The specific accident reporting and recording criteria for each State/Territory at all times could not be traced. These notes are derived from footnotes to the tables in the sources used.

<i>Note</i>	<i>Year</i>	<i>Comment</i>
<b>Accidents and casualties</b>		
1	1925 to 1935	Mixture of data for year ending 30 June or 31 December.
2	1925 to 1961	Data for Northern Territory not collected.
3	1927 to 1937	Data from a summary published in 1937. Figures are higher than those published annually.
4	1935 to 1949	Casualty accidents not reported separately.
5	1936	Includes 1935 figures for Victoria.
6	1937 to 1961	All data for year ending 30 June.
7	1948, 1949	Series not comparable with subsequent years.
8	1950	National accident reporting criteria of death, injury or more than £10 property damage promulgated (but not nationally adopted). Change to published data for casualty accidents only.
9	1953	Prior to 1953, data for Western Australia non-metropolitan accidents were included only if fatal or near fatal injury resulted. From 1953, Western Australia non-metropolitan accident data included were in line with national injury definition of need for surgical or medical treatment.
10	1957	Tasmanian and Australian Capital Territory injury criteria not comparable with those in other States. Queensland criterion for reporting property damage accidents changed from any property damage to at least £25 damage.
11	1958	Casualty accident data recorded on a more uniform basis across Australia.
12	1960	New South Wales criterion for reporting property damage accidents changed from £10 to £25 damage from 1 May.
13	1962 to 1977	Data for year ended 31 December. Northern Territory figures for 1962 are for July to December only.
14	1967	South Australia criterion for recording casualty accidents and casualties changed from any injury to injury requiring surgical or medical treatment, from 1 October.
15	1969	Queensland criterion for reporting property damage accidents changed from \$50 to \$100 property damage from April 1969. Western Australia ABS no longer recording or publishing property damage accident data.
16	1975	South Australia criterion for reporting property damage accidents changed from \$50 to \$100 property damage from March 1975. New South Wales criterion for recording accidents changed from casualty or at least \$50 damage to casualty or at least one vehicle towed away from 1 July.

<i>Note</i>	<i>Year</i>	<i>Comment</i>
17	1976	Queensland criterion for reporting property damage accidents changed from \$100 to \$300 property damage from 1 January. ABS consider that under-reporting of accidents involving less severe injuries may have occurred over an unknown period in Australia particularly in Victoria in 1974 and 1975.
18	1977	New South Wales criterion for reporting property damage accidents changed from \$50 to \$300 damage from 28 July. In Western Australia, introduction of a new traffic accident report form in August 1977 may have led to inclusion of casualty accident data previously excluded where the person injured did not require surgical or medical attention.
19	1978, 1979	Casualty and injury data not collected by the Australian Bureau of Statistics.
20	1980, 1981	Australian Bureau of Statistics criteria for definition of casualty/ injury changed to include only those accidents involving admission to hospital.

#### **Licences issued**

21	1954 to 1981	Excludes Queensland.
22	1963 to 1967	Excludes Northern Territory. Depending on licensing practice, data may only include licences issued or renewed, excluding those already on issue. Some areas require separate licences for each category of vehicle driven; others allow endorsement for additional vehicle types on one licence.

#### **Fuel consumed**

23	1947 to 1981	Includes motor spirit and automotive diesel (used and stored). It is not known how much diesel fuel is used by road transport, separately from usage by railways, farms and ships.
24	1950 to 1961	Excludes Northern Territory data except for kilolitre rates. Separate data for Northern Territory not available.
25	1954 to 1981	Excludes Queensland for rates per 10 000 licences.
26	1963 to 1967	Excludes Northern Territory data for rates per 10 000 licences.
